

Mobile Water Tank

Charge Your Clean
with On-Demand Water Access

The Gausium Mobile Water Tank is a versatile solution designed to seamlessly connect with the Phantas workstation and Scrubber 50 workstation (new model). Perfect for environments where direct water access is unavailable, this mobile tank ensures that your cleaning operations remain uninterrupted.

Key Features

Plug-and-Play Operation

No need for complex installation of water supply and drainage systems. The mobile water tank is ready to use right out of the box.

Efficient Water Recycling

The advanced water circulation design ensures no unpleasant odors and supports ultra-long operation time, lasting over a week without needing a refill.

Convenient Maintenance

Daily cleaning and maintenance are streamlined with a single station, making it easy to keep the entire system in top condition.

Smart Alerts

Stay informed with smart notifications delivered to your mobile device, including water level reminders and filter replacement alerts.

Specifications
